

<b>Action Plan for the Steering Committee on the development of Black Sea Ring Highway</b>						
	<b>Targets</b>	<b>Short &amp; long term objectives</b>		<b>Measures on short &amp; long term objectives' realization</b>	<b>Deadline</b>	
1.	<b>Identification of the main BSRH route and its connections</b>	1.1	Identification of the terms “main route” and “connections”	1.1.1	Elaboration of term “main route” and “connections”	
				1.1.2	Consideration of the proposed draft terms by the Parties	
				1.1.3	Approval by the Parties for the terms with the view of its further use at work during the development of BSRH	
		1.2	Approval for the main route and its connections	1.2.1	Application of proposals by the Parties on the BSRH route, passing through the territory of their States	
				1.2.2	Consideration by the Parties of the presented proposals, conduction of essential bilateral and multilateral consultations in order to approve the BSRH route	
				1.2.3	Acceptance of BSRH route (main route and its connections), passing through the territory of all the Parties of MoU	
2.	<b>Identification of technical standards and interoperability</b>	2.1	Collection of information concerning the BSRH main route and its connections	2.1.1	Drawing up of the Questionnaire by the JPTS on the national BSRH main route and its connections and its submission to the Member States for completion	
				2.2.2	Completion of the questionnaire by the Parties and its return to the JPTS	

			2.2.3	Processing of information and drawing up of a report by the JPTS with the view of further discussion of the BSRH technical standards	
		2.2	Creation of common set of technical standards for achievement of optimal interoperability and providing of intermodality	2.2.1	Application of proposals by the Parties concerning BSRH technical standards with respect to Annex 2 of the European Agreement on Main international Traffic Arteries (AGR)
				2.2.2	Consideration of the proposals on technical standards by the Parties
				2.2.3	Approval for BSRH common technical standards
3.	<b>Approval of a general plan of BSRH development</b>	3.1	Consideration and approval for proposals on BSRH development, including, objects of BSRH transport infrastructure	3.1.1	Consideration and approval for proposals on BSRH development, including, objects of BSRH transport infrastructure
				3.1.2	Determination of periods on bringing of BSRH main route and its connections into conformity with approved technical standards
		3.2	Identification of financial needs on BSRH development	3.2.1	Preparation by the JPTS and submission for approval to the StC for proposals regarding the approach and necessary actions for the investigation of financial resources
				3.2.2	Information of JPTS concerning conditions under which any International Financial Institute provides the financing of different

				studies and projects		
			3.2.3	Consideration of possibility of private sector involvement in BSRH development		
		3.3	Consideration of possibility of providing of necessary assistance to BSRH participants in designing, construction, maintenance service and exploitation of BSRH, as well as in its development administration on the territory of BSEC Member-States	3.3.1	Consideration of Parties' requests regarding the necessity of getting of relevant assistance	
				3.3.2	Solution of the issue concerning the possibility of providing of necessary assistance and its conditions	
4.	<b>Approval of general policy on BSRH use</b>	4.1	Approval for general policy concerning the compensation of damage and charge for the use of BSRH transport infrastructure	4.1.1	Drawing up of a questionnaire by the JPTS on the policy, conducting by the Parties, concerning the compensation of damage and charge for the use of BSRH transport infrastructure for the purpose of further determination of the common policy on given issues	
				4.1.2	Elaboration of common standards of the compensation of damage and charge for the use of BSRH transport infrastructure	
				4.1.3	Approval for common standards of the compensation of damage and charge for the use of BSRH transport infrastructure	

		4.2	Elimination of administrative and other barriers in the exercise of international road transportation on BSRH routes	4.2.1	Carrying out by the JPTS of an analyses of existing administrative and other barriers in the exercise of international road transportation on BSRH routes and its submission to the StC	
				4.2.2	Determination of necessary measures for the elimination of existing administrative and other barriers in the exercise of international road transportation on BSRH routes	
				4.2.3	Approval for measures and periods on the elimination of existing administrative and other barriers in the exercise of international road transportation on BSRH routes	
5.	<b>Drawing of attention of international organizations to BSRH development with the purpose of inclusion of BSRH in the network of transeuropean transport corridors and coordination</b>	5.1	Involvement of international organizations for cooperation on the BSRH development with the purpose of inclusion of BSRH routes into the network of transeuropean transport corridors and coordination of activity on elimination of existing barriers in the exercise of international road transportation	5.1.1	Involvement of international organizations for cooperation on the issue of inclusion of BSRH in the network of transeuropean transport corridors	
				5.1.2	Carrying out of essential studies with a view to avoid the duplication of activity on elimination of existing administrative and other barriers in the exercise of international road transportation	

				5.1.3	Achievement of arrangements with international organizations concerning the coordination and activity management on elimination of existing administrative and other barriers in the exercise of international road transportation
