PRESS RELEASE

ROMANIA OIL AND GAS SUMMIT
(Bucharest, 16-17 March 2016)

Romania is the earliest hydrocarbon producing country in the region and is an important oil and gas producer. Recent exploratory drillings in the Black Sea shelf are confirming the above.

“Romania Oil and Gas Summit” will take place in Bucharest on 16-17 March 2016, an event organized by industry specialists of the Global Event Partners, a private company based in the United Kingdom, in close cooperation with the Ministry of Energy of Romania.

The Black Sea Economic Cooperation Organization is supporting this event that brings together government officials, public and private sector leaders, national and international oil companies, operators, energy performance specialists, and global experts. They will be offered an insight into the strategic plans being undertaken to insure Romania's energy security and will take a look at the bigger picture in the region and the wider European energy industry with a view to ensuring security and diversity of energy supplies.

The BSEC Permanent International Secretariat will participate in the event, mainly underlining the importance of international cooperation to ensure energy security for the BSEC Member States and the role Romania may play in this regard.

For further information, please visit www.rog-summit.com or contact Rob Percival, Programme Director, on +44 (0)1737 784951 or email rpercival@gep-events.com.
